Hello there!(10 house points to you if you understand that reference!)This my website to complete my coursework for Code Nation. If you would like to see all my answers on this page just keep scrolling. Or if you want to make sure the links work feel free to use them!

# About Me!

My name is Thomas McDonagh and I am a recent graduate from the University Of Central Lancashire. Upon graduation, I was on universal credit trying to get work unsuccessfully for six months. Upon researching opportunities I discovered Code Nation and was very interested in the hands-on approach that code nation offered. With the Covid-19 happening, I was offered the chance to do a virtual-only course which I took since I would be able to use that time productively.

# Unit 1, outcome 1, question 1

The purpose of IT in companies can vary from each company. There are corporations that rely on IT like video game companies, so IT is at the very core of their business. This means all their employees will have to have IT skills to some degree. There are also companies that rely on IT but can operate without it. Such as companies like ASDA or
